| • Brazil | • Japan | • British Columbia |
| • India | • China | • Quebec |
| • New Zealand | • Mexico | • Saskatchewan |
| • U.S. (~30 states) | | • Alberta |

Profile:

Jeff assists clients with EHS / HMT auditing, regulatory compliance and counseling. Jeff leverages his legal and technical experience to provide clients with meaningful and value-driven services. Jeff has led numerous regulatory audits focused on all aspects of Environmental, Health & Safety, and Dangerous Goods Transportation in over 30 states and 12 countries.

Jeff is well versed in multiple audit protocols, specific corporate requirements, and various local, provincial and national regulations. Jeff's auditing experience spans several divergent industries from Chemical Manufacturing to Power Generation to Retail Distribution. This flexibility allows clients to tailor their resources into any combination of deliverables whether it be regulatory specific audits such as RMP/PSM or broader due diligence assessments under RCRA and CERCLA.

Jeff manages the firm's waste and recycling evaluation program which provides legal oversight regarding the proper management of client's waste streams from cradle to grave. Through this program Jeff has firsthand knowledge in the recycling, reuse, and disposal for much of the industrial, hazardous and toxic waste generated in the United States. This experience allows the firm to accurately assess client's risks associated with downstream waste and recycling vendors and communicate agency enforcement trends as well as cost saving opportunities in an ever-expanding industry.

Jeff has also completed several projects designed to equip clients with the tools necessary to achieve sustained robust legal compliance, including in-person and web-based remote training sessions, EHS plans and procedures, and internal control systems such as self-assessment and internal auditing protocols.

Jeff also drafts legal memoranda regarding agency regulatory interpretations, risk exposures, and necessary corrective measures which clearly communicate the core issues to stakeholders and feasible options for sound legal resolution.

Audit / Compliance Competencies:

- Clean Air Act: Title V, NSPS/NESHAP MACT, RMP
- Clean Water Act: NPDES and §404 permitting, drafting spill prevention plans (SPCC, SWPPP, PIPP and FRP)
- RCRA: Hazardous / Solid Waste, Used Oil, PCBs and TSCA
- OSHA: 1910/1926 – general industry/construction safety, PSM
- Dangerous Goods: USDOT HMR, TDG, ADR, IATA and IMDG
- Export/Import/Security: C-TPAT, ESURCR
- Federal Controlled Substances Act: DEA Chemical Handling
- Management Systems: ISO 14001, ISO 18001
